

NCF1590UVR

NCF1590UVR

NCF1590UVR is an open mesh, Leno weave belting material designed for use in forced hot air dryers. The warp yarns are NOMEX®, which allows the belt to conform to machine irregularities. The black UV resistant coating protects the belting fabric in UV curing systems. The unique properties of NCF1590UVR allow for fabrication options not available with PTFE-coated fiberglass belting products.
